**RESPONSE TO RESTRICTION REQUIREMENT**

Sir:

20 In response to the Restriction Requirement issued by the  
Examiner on August 2, 2006, the following is submitted:

The Restriction is set forth at page 2 of this response; and

An election without traverse and remarks begin at page 3 of

25 this response.

30

## The Restriction

The Examiner has required an election between the claims of Group I, including claims 1-46 drawn to a method of making porous inorganic material and the claims of Group II, including claims 47-80, directed to an inorganic polymer composite and or an open pore inorganic structure. The reason for the restriction is that Groups I and II are believed by the Examiner to be distinct as he states that the product can be made by a different process.

Further, the Examiner states that the claims of Group I are classified in Class 264, subclasses 43, while the claims of Group II would be classified in Class 623, subclass 11.11.

20

25

Election and Remarks

Applicant hereby elects the claims of Group I, including  
5 claims 1-46 without traverse.

Should the Examiner have any questions regarding this  
matter, the Examiner may contact the undersigned attorney for  
purposes of further expediting this application.

10

Respectfully Submitted,

DOWELL & DOWELL, P.C.
